TDARX, INC.. PROVIDES REMOTE PERFORMANCE MANAGEMENT SOLUTIONS TO CUSTOMERS

Leading Unified Communications Provider Helps Customers Pre-Assess and Continuously Monitor Network Infrastructure for Smooth Operations

WINSTON SALEM, NC – February 28, 2011 – TDARx, Inc., an industry leader in unified communications, announced today that the company is providing its customers with Remote Performance Management Solutions. This technology offers a cost-effective remote monitoring and management capability to diagnose underlying network problems, assess network readiness and monitor application performance. This advancement is allowing businesses to capitalize on powerful applications such as VoIP, video, SaaS/ cloud services, disaster recovery and desktop virtualization.

Gartner analysts caution that “75 percent of enterprises that do not perform a pre-implementation analysis of their IP network infrastructure will not achieve a successful VoIP implementation.” Transitioning physically separate voice and data networks onto a single shared infrastructure without compromising the quality of either voice traffic or data traffic will require new practices and procedures. Remote Performance Management Solutions play a central role in successful network assessment.

“The cloud is growing and as a result businesses are becoming increasingly dependent on cloud-based technologies to run their businesses,” commented Mike Shuping, President of TDARx. “One example revolves around VoIP technology. Many business owners are attracted to VoIP because of its cost savings and applications that drive employee productivity; however some business owners hesitate because they are concerned about sacrificing call quality. This often occurs when companies conduct business with a technology provider that does not have the proper technical expertise or the tools to successfully deploy IP based solutions. Leveraging advanced Remote Performance Management Software pinpoint network drains, all the way down to the appliance. The tool provides valuable insight that can determine which appliance such as a PC within an organization is sucking up bandwidth causing poor voice or video quality.”

In order to keep up with the rapid pace of technology, data networks will need to become much stronger, faster, flexible and transparent. The success of a business’s operations will be strongly correlated to network performance and Remote Performance Management Solutions allow businesses to diagnose network issues and

resolve problems immediately. Data networks are the lifeblood of business operations and companies like TDARx are proactively protecting their customers, increasing their profitability and providing them with a competitive advantage.

ABOUT TDARx, INC..

TDARx, Inc. came into existence when TeleData Services, Inc., a regional leader in business communications, and Arx Technology, Inc., a leading provider of computer and data networking technologies, merged in January 2008. The merger enhances TDARx's expertise in a full line of communication technology, which helps its customers increase their profitability and improve competitive advantage.

TeleData Services, Inc. was founded in 1988 by Mike Shuping with partners Michael Nester and Larry Halsey. For the past 20 years, TeleData Services has been and is committed to establishing and maintaining a dynamic partnership with every customer. Extensive technology and service experience allowed the TeleData Services, Inc. team to develop an understanding of each customer's unique telecommunications requirements, and to respond to those

requirements quickly and effectively.

Founded in 2001 by owner Wesley Walker, Arx Technology had been fulfilling the IT needs of Triad businesses. The company has over 350 customers and eight certified engineers. These professionals have a number of

advanced industry certifications including Microsoft, Macintosh, Cisco, Citrix, Novell, and Linux and provides IT-based growth strategies for small and medium businesses. Arx specializes in data, technology and network consulting, security and support.

Today, TDArx is poised to help its customers maximize the return on their investment in communication technology. With TDArx, you can focus on your business, while we focus on your IT! For more information, please contact us at (336) 896-0808 or visit www.tdarx.com.
