TDARx Helps Customers Combat Recession with Advanced Technology

SMBs Leverage Solutions Designed to Enhance Productivity and Profits

WINSTON SALEM, NC – June 30, 2011 - TDARx, Inc., a leading unified communications provider, announced today that the company is proactively protecting its customers from antiquated technology and providing them with a competitive advantage in their marketplace. By providing extensive technical training to the staff, TDARx has been able to leverage the superior knowledge of its workforce to detect and protect its customers from aging technology, all the while increasing their profitability and providing their customers with a competitive advantage.

The latest technology that TDARx has introduced to its customers is Session Initiation Protocol (SIP). The advent of SIP has expanded the limits of traditional telephony and has enabled many business owners to experience the benefits of sophisticated IP Telephony. The driving factor behind SIP is that the technology cuts many redundant costs associated with traditional telephony systems. Additionally, businesses are also attracted to SIP because of the ease in which it expands an organization's overall capabilities. For example, SIP Trunking provides significant improvements in call quality for IP based telephony by dedicating a separate "channel" to handle the

traffic. SIP Trunking also supports multiple forms of communication including video and instant messaging so businesses can reach out to customers through a myriad of mediums. TDARx's salespeople are technological experts who consistently research developing technologies, like SIP, and bring them to customers in order to enhance their profitability and increase their competitive advantage.

"By transitioning a number of our telecommunications customers from antiquated TDM, PBX and Key Systems to more refined IP Telephony systems we've chopped many of our customers phone bills in half," states Mike Shuping, President of TDARx. "We viewed this program as an investment in our customers' future. Basically, the bet we made was that if our staff was constantly examining and testing out new technology, eventually we'd find something that we could bring to our customers before their competitors even knew what was on the horizon. Nothing makes us happier than to see our customers utilizing our technology to leave their competitors in the dust."

TDARx is also associated with Technology Assurance Group (TAG) which is an international organization that collectively represents approximately \$350 million in products and services in the unified communications industry. Dale Stein, Partner of

TAG, comments "TDARx has always been an innovator. We're thrilled to hear that their new program has been a success and we're pleased to be associated with a thought-leader in their prestigious business community."

ABOUT TDARx, INC..

TDARx, Inc. came into existence when TeleData Services, Inc., a regional leader in business communications, and Arx Technology, Inc., a leading provider of computer and data networking technologies, merged in January 2008. The merger enhances TDARx's expertise in a full line of communication technology, which helps its customers increase their profitability and improve competitive advantage.

TeleData Services, Inc. was founded in 1988 by Mike Shuping with partners Michael Nester and Larry Halsey. For the past 20 years, TeleData Services has been and is committed to establishing and maintaining a dynamic partnership with every customer. Extensive technology and service experience allowed the TeleData Services, Inc. team to develop an understanding of each customer's unique telecommunications requirements, and to respond to those requirements quickly and effectively.

Founded in 2001 by owner Wesley Walker, Arx Technology

had been fulfilling the IT needs of Triad businesses. The company has over 350 customers and eight certified engineers. These professionals have a number of advanced industry certifications including Microsoft, Macintosh, Cisco, Citrix, Novell, and Linux

and provides IT-based growth strategies for small and medium businesses. Arx specializes in data, technology and network consulting, security and support.

Today, TDArx is poised to help its customers maximize the return on their investment in

communication technology. With TDArx, you can focus on your business, while we focus on your IT! For more information, please contact us at (336) 896-0808 or visit www.tdarx.com.
