TDARX, INC.. HELPS COMPANIES TAKE ADVANTAGE OF SIGNIFICANT TAX-BREAKS FOR NEW TECHNOLOGY

*TDArx, Inc. Educates Customers on
Powerful Stimulus Plan*

WINSTON SALEM, NC — November 29, 2011 — TDArx, Inc., a leading provider in unified communications, announced today that the company is helping customers take advantage of a large tax-break for small to mid-sized businesses with Internal Revenue Code (IRC) Section 179. The tax benefit targets businesses who are contemplating large equipment purchases, such as technology, and significantly reduces the cost of purchasing such equipment. Section 179 allows business owners to write-off the entire cost, up to \$500,000, on new equipment purchases made by December 31st, 2011.

Many Americans were left wondering how the Stimulus Package would have an impact on their lives and Section 179 has answered that question for many business owners. Creating significant savings on major purchases of equipment, software or phone systems, the federal government has enacted this bill in an effort to spur business-to-business spending. Right now businesses can

expense the entire purchase price of qualifying equipment/software/phone systems in the first year up to \$500,000 (to be reduced to \$125,000 at the end of the 2011 tax year). Also slated to expire at the end of the 2011 tax year is the 100% Bonus Depreciation, which will drop down to 50 percent. For example, assuming you're in a 35% tax bracket, a \$45,000 purchase would drop dramatically, and would cost approximately \$29,250 after Section 179 has been applied to the transaction. In a transaction like this, Section 179 would yield a total savings of \$15,750. While every transaction is different and tax professionals should be consulted on specific situations, the potential rewards of this government program has persuaded many business owners to seriously consider investing in new equipment before year-end.

The one caveat associated with this powerful program is that the new equipment must be in use by December 31, 2011 in order to qualify for the massive savings. This year, Section 179 also extends to cover software purchases in addition to traditional equipment. Many

business owners have installed new business phone systems as a result of this addition to the tax code, because recent breakthroughs in telecommunications are enabling businesses to collaborate better, faster and more efficiently with one another.

"We were stunned to find out that so many of our customers had not yet heard of Section 179," commented Mike Shuping, President of TDArx, Inc.. "We may specialize in delivering technology solutions to our customers, but we treat our customers like partners. If we find something as powerful as this we have always considered it to be our duty to communicate this information to our customers. Our goal is to introduce our customers to technology that increases their productivity, but more importantly increases their profitability. When an opportunity like this comes along, we're thrilled to skip discussions regarding technology, and go straight to the part where our customers get to enjoy increased profitability. That's why we're different and

we plan on continuing to treat our customers like gold.”

ABOUT TDArx, INC..

TDArx, Inc. came into existence when TeleData Services, Inc., a regional leader in business communications, and Arx Technology, Inc., a leading provider of computer and data networking technologies, merged in January 2008. The merger enhances TDArx's expertise in a full line of communication technology, which helps its customers increase their profitability and improve competitive advantage. TeleData Services, Inc. was founded in 1988 by Mike

Shuping with partners Michael Nester and Larry Halsey. For the past 20 years, TeleData Services has been and is committed to establishing and maintaining a dynamic partnership with every customer. Extensive technology and service experience allowed the TeleData Services, Inc. team to develop an understanding of each customer's unique telecommunications requirements, and to respond to those requirements quickly and effectively.

Founded in 2001 by owner Wesley Walker, Arx Technology had been fulfilling the IT needs of Triad businesses. The company has over 350 customers and eight

certified engineers. These professionals have a number of advanced industry certifications including Microsoft, Macintosh, Cisco, Citrix, Novell, and Linux and provides IT-based growth strategies for small and medium businesses. Arx specializes in data, technology and network consulting, security and support.

Today, TDArx is poised to help its customers maximize the return on their investment in communication technology. With TDArx, you can focus on your business, while we focus on your IT! For more information, please contact us at (336) 896-0808 or visit www.tdarx.com.
