CLEARFLY COMMUNICATIONS, INC. AND TDARX, INC.. **ANNOUNCE STRATEGIC PARTNERSHIP**

Companies Team Up to Deliver World-Class SIP Solution

WINSTON SALEM, NC – May 1, 2012 - Clearfly Communications, the premier carrier and leading national provider of SIP trunking, announced today the formation of a strategic partnership with TDARx, Inc., a leading unified communications provider. The companies have aligned in order to provide small and medium size businesses in under-serviced suburban markets with "large business" like voice, data, and mobile services at a cost that is affordable and in a package that is manageable.

SIP is an IETF (Internet Engineering Task Force), internet based protocol originally designed for call set-up and control. According to the SIP RFC, the protocol defines how two or more end-points can negotiate to set up and control a communications connection that suits the capabilities of the devices and the needs of its users. In simple terms, SIP supports any form of real-time communication regardless of whether the content is voice, video, instant messaging, or a collaboration

application. Additionally, SIP enables users to inform others of their status, their availability, and how they can be contacted before a communication is even initiated.

SIP trunking may deliver a myriad of benefits, yet the driving factor behind its widespread adoption is the substantial cost savings which it provides to entrepreneurs and enterprises alike. Several smaller organizations can leverage SIP trunks in order to gain access to new features and functionality, such as Caller ID, Local DID, etc., which were previously excessively expensive or reserved exclusively for large companies. SIP is leveling the playing field and has successfully brought enterprise-class solutions to small to mid-sized business (SMB) looking to compete with larger companies in their industry.

Many larger enterprise sized companies have taken note and are also taking a hard look at SIP trunks. With many large organizations looking for new ways to increase profitability and secure a strong foothold in their industry, SIP is coming under the microscope quite

often. SIP improves efficiency and consolidates cost across all areas of an organization's network which makes it much easier for companies to focus on mission-critical areas of the business, rather than funneling money to business communications systems. In fact, many enterprises are harnessing the power of SIP in order to edge out their competitors and secure their spot at the forefront of their industry.

"TDARx is an outstanding match," said Chris Hunter, North American Sales Director for Clearfly Communications. "TDARx is an exemplary organization and we're proud to be working with them. They understand how important it is to provide their customers with quality service and we believe that's why they've been so successful over the past several years."

As a leading provider of Unified Communications solutions, TDARx offers an array of technology that helps their customers achieve their strategic business objectives. Now an authorized dealer for Clearfly Communications products,

TDArx will drive SIP IP PBX sales in the region.

ABOUT TDARX, INC.

TDArx, Inc. came into existence when TeleData Services, Inc., a regional leader in business communications, and Arx Technology, Inc., a leading provider of computer and data networking technologies, merged in January 2008. The merger enhances TDArx's expertise in a full line of communication technology, which helps its customers increase their profitability and improve competitive advantage.

TeleData Services, Inc. was founded in 1988 by Mike

Shuping with partners Michael Nester and Larry Halsey. For the past 20 years, TeleData Services has been and is committed to establishing and maintaining a dynamic partnership with every customer. Extensive technology and service experience allowed the TeleData Services, Inc. team to develop an understanding of each customer's unique telecommunications requirements, and to respond to those requirements quickly and effectively.

Founded in 2001 by owner Wesley Walker, Arx Technology had been fulfilling the IT needs of Triad businesses. The company has over 350 customers and eight

certified engineers. These professionals have a number of advanced industry certifications including Microsoft, Macintosh, Cisco, Citrix, Novell, and Linux and provides IT-based growth strategies for small and medium businesses. Arx specializes in data, technology and network consulting, security and support.

Today, TDArx is poised to help its customers maximize the return on their investment in communication technology. With TDArx, you can focus on your business, while we focus on your IT! For more information, please contact us at (336) 896-0808 or visit www.tdarx.com.
