TDARx, Inc. Fosters Technology Adoption with K-12 Schools

*Leading Unified Communications
Provider Helps Education Leverage
Today's Technology*

WINSTON SALEM, NC – December 4, 2013 - TDARx a leading provider of unified communications, announced today that the company will be launching a program designed specifically for the education market. Today's teachers are utilizing outdated technology which is not only robbing them of much needed functionality but is also incurring unnecessary expenses during tough economic times. TDARx is actively spreading awareness about several of today's technology advancements which increase a school's capacity to collaborate, establish continuous communication channels and most importantly, improve overall campus security. These developments are affecting the lives of students, teachers, faculty, administrators and parents alike.

"Today's school phone system is not like our parents' phone system," stated Mike Shuping, President of TDARx. "Today, we're able to provide educators with dramatically greater levels of communication and security than ever before. Frankly, this technology simply

didn't exist in years past, and we're thrilled to finally be able to bring this caliber of technology to our school systems, for a cost that they can actually afford, especially since the features are much needed."

One of the growing concerns of schools across the nation is security. With the unfortunate growth of domestic terrorism, this issue of campus safety has come to the forefront of discussion. Recent advancements in technology have given TDARx the ability to increase overall campus security like never before. One example is the development in instant messaging capabilities. For instance, in the event of an intruder on campus, students and teachers are now able to receive instant notification on their phones and 911 lockdowns are immediately initiated. In the event of such an emergency, two-way classroom communication allows teachers to speak back and forth with a central office than waiting for help. Such security is invaluable and provides far greater levels of comfort for parents and local district officials of schools that are deploying this type of technology.

Another far less dramatic usage for the same instant mass

messaging technology, is targeted group messaging. An example of this in action would be if a basketball game were being cancelled, all patrons, students, athletes, officials, parents and transportation could immediately be notified of the cancellation, instead of having to coordinate with everyone separately. Furthermore, these messaging functions also ensure that the sent messages are delivered, received and read by the intended recipient, adding a new element of clarity.

Another in-classroom example of new technology impacting educators is the fact that teachers can now eliminate the mundane repetitiveness of taking daily classroom attendance. It is now commonplace for students to have cell phones and teachers can now take attendance with the push of a button via cell phone. "There are plenty of features and advancements to examine that enable schools to communicate more effectively, enhance security, and save time for educators and students," added Mr. Shuping.

ABOUT TDARx, INC..

TDARx, Inc. came into existence when TeleData

Services, Inc., a regional leader in business communications, and Arx Technology, Inc., a leading provider of computer and data networking technologies, merged in January 2008. The merger enhances TDArx's expertise in a full line of communication technology, which helps its customers increase their profitability and improve competitive advantage.

TeleData Services, Inc. was founded in 1988 by Mike Shuping with partners Michael Nester and Larry Halsey. For the past 20 years, TeleData Services has been and is committed to establishing and maintaining a

dynamic partnership with every customer. Extensive technology and service experience allowed the TeleData Services, Inc. team to develop an understanding of each customer's unique telecommunications requirements, and to respond to those requirements quickly and effectively.

Founded in 2001 by owner Wesley Walker, Arx Technology had been fulfilling the IT needs of Triad businesses. The company has over 350 customers and eight certified engineers. These professionals have a number of advanced industry certifications

including Microsoft, Macintosh, Cisco, Citrix, Novell, and Linux and provides IT-based growth strategies for small and medium businesses. Arx specializes in data, technology and network consulting, security and support.

Today, TDArx is poised to help its customers maximize the return on their investment in communication technology. With TDArx, you can focus on your business, while we focus on your IT! For more information, please contact us at (336) 896-0808 or visit www.tdarx.com.
